16 VCS 126

Consider the following employee database:

employee (employee_name, street, city)

works (employee_name, company_name, salary)   8766656550

company (company_name, city)

manages (employee_name, manager_name)   7340011024

Solve the following queries in SQL:

1. Find the names and cities of residence for all employees who work for 'cygnet infotech'.
2. Find the names of all employees in the database who live in the same cities as the companies for which they work.
3. Find the names of all employees who earn more than the average salary of all employees of their company.
4. Give all employees of 'Dell' a 10% increment.
